Standardized Maps for Hazardous Materials Accidents ,1979 Problems reported by emergency response personnel in developing pre-emergency plans and making tactical decisions during hazardous materials transportation emergencies prompted the Safety Board to conduct this special investigation. The investigation disclosed a need to improve methods for predicting the expected behavior of hazardous materials in emergencies, for both preplanning and tactical uses. Existing information sources were found to be inadequate for these purposes. A method to improve the recording of hazardous materials behavior in accident investigations that will improve preplanning and tactical decisionmaking for hazardous materials emergencies was identified and has been adopted as a tentative accident reporting standard by the Safety Board for accidents involving hazardous materials. Immediate and potential uses for the standardized hazardous materials behavior maps are identified and implementation problems are discussed.

Universities in Transition Bo Göransson,Claes Brundenius,2010-12-16 Globalization, the information age, and the rise of the knowledge-based economy are significantly transforming the way we acquire, disseminate, and transform knowledge. And, as a result, knowledge production is becoming closer and more directly linked to economic competitiveness. This evolution is also putting new and urgent demands on academic institutions to adjust to the changing needs of society and economy. In particular, there is growing pressure on the institutions of higher education and research in developed economies to find and affirm their new role in the national innovation system. Their counterparts in developing economies need to define their role in supporting emerging structures of the innovation system. This book examines the role of universities and national research institutes in social and economic development processes. Featuring contributions that showcase initiatives and innovations from around the world, including China, Eastern Europe, Latin America, Scandinavia, Southeast Asia, sub-Saharan Africa, and Western Europe, it offers timely insight that will be of interest to policymakers, university administrators, economic and social leaders, and researchers alike.
