Laundry Detergents Eduard Smulders,Wilfried Rähse,2002-03-12 This monograph provides a comprehensive survey of the parameters involved in textile washing, in particular the action of detergents. The authors describe the physical and chemical principles of the washing process, as well as the composition, production and action of household and industrial detergents. Furthermore, products and processes in use not only in Europe but also in Japan and the USA are surveyed. A special chapter is devoted to modern methods of detergent analysis. Throughout the book particular emphasis is laid on ecological and toxicological aspects. A discussion of the economic importance of detergents and relevant information about textile types and washing machines complete the book. This publication is not only intended for specialists in industry and academia, it will also give environmental consultants, journalists and other interested readers insight into the complex field of laundry detergents.

Detergency of Specialty Surfactants Floyd Friedli,2001-02-07 This volume seeks to advance cost-effective methods using newly-developed surfactants. It summarizes data from physical, chemical, surface, detergency, cleaning, toxicity and environmental sources for designing new formulations of classic organic head-tail surfactants in response to increased environmental, toxicity, safety and performance demands.

Surfactants in Consumer Products Jürgen Falbe,2012-12-06 In today's market, custom formulated surfactants are offered for a wide range of applications. The need for surfactants in detergents, cleaning agents, cosmetics & toiletries is second only to an expanding demand in industrial applications. But even within the non-industrial areas the demands have undergone significant changes in recent years. For example, washing and cleaning temperatures have substantially decreased with increased energy conservation attitudes, and more stringent regulatory requirements in the area of ecology and toxicology are leading to new product profiles. New manufacturing technologies and an increased utilization of natural raw materials also factor into this continuing evolution. These changes and trends have been described in numerous publications. However, a summary and survey of these developments is currently missing. The book presented here

Surfactants in Consumer Products is intended to close this gap. The editor and authors dedicate this work to Dr. Dr. h.c. Konrad Henkel on the occasion of his 70th birthday. Dr. Henkel, himself a scientist and industrialist, contributed significantly to developments in the surfactant field. In the nineteen-fifties, he initiated the change from soap based detergents to synthetic detergents within Henkel. At the same time, dishwashing detergents utilizing various synthetic surfactants were also developed, and became the basis for modern manual and mechanical dishwashing.

Corrosion Resistance of Nickel and Nickel Alloys Against Acids and Lyes Michael Schütze, Raul B. Rebak, Roman Bender, 2015-01-27 Derived from the online reference Corrosion Handbook, this handbook brings together all the relevant information on corrosion protection and prevention for nickel-based materials, all in a convenient and easy-to-use format. As such, it provides scientists and engineers manufacturing and utilizing these materials with comprehensive information, including tabulated data and references, on their corrosion behavior when in contact with acids and hydroxides.
